

Lash Lift & Tint

PREP

- Remove contact lenses before your treatment.
- Come to your appointment without any eye makeup. If you arrive with it we will provide you with makeup remover (Please arrive early if you need to remove your eye makeup) *coming with eye makeup is not recommended.
- Avoid using waterproof mascara 2-3 days prior as it can leave a residue that may prevent lashes from lifting properly.
- Avoid curling your natural lashes with a lash curler for 24 hours prior to your appointment.
- Ensure that you do not have an eye infection or irritation of the eye area - as treatment cannot be performed until this has cleared up.
- If you have had Lasik surgery, you must wait a minimum of 6 months from the time of your procedure.
- If you haven't filled out the consent form prior to your appointment, come a little early to complete it.
- **We can not do a Lash Lift & Tint if you currently have extensions.**
- **Please wait one week after the use of antibiotics to book your lash lift and/or tint**
- **Please note you must wait 12 months post chemotherapy to have a lash lift and/or tint**

AFTERCARE

A Lash Lift is a very low maintenance procedure however there is a bit of care for the first 24 hours

- Do not soak your lashes wet for the first 24 hours.
- Avoid hot water, steam rooms & swimming for the first 24 hours.
- No mascara for the first 24 hours & avoid waterproof mascaras in general.
- Sleep on your back or side & keep your lashes off the pillow for the first 24 hours. Your lashes are prone to kinks during the first 24 hours after the procedure.
- Wait at least 4 weeks until your next lift & tint appointment.
- Avoid eyelash curlers as they may weaken and damage your lashes.
- Do not touch or rub your eyes and eyelashes immediately after the treatment.
- If redness or irritation occurs, apply a cool damp cotton compress to the eye area. If symptoms persist for more than 24 hours seek medical advice.
- Be gentle with your lashes - no rubbing or pulling.
- Remove eye makeup gently with non-oily remover.
- Gently brush your lashes as needed with a lash brush.
- Avoid any oils around your eyes for 2 days after treatment.
- Conditioning your lashes will keep them healthy and prolong the life of your lash lift and tint.
